

The worst is that you have nothing that can protect you!

Even on the contrary - you are completely exposed to the danger!

video:  
[www.schaefer-protect.de](http://www.schaefer-protect.de)

Your life is in great danger because you are completely unprotected!

You are important part of our leaders and elites - and therefore always a target for attacks - requiring maximum security.

But your enemies use total new techniques and weapons. Your security systems **cannot** cope with these anymore!

Therefore urgent action to improve your safety measures is needed!

**The reason:** insidious high-tech attacks, remote-controlled, without any present attacker, completely imperceptible by day and night.

**The tragedy:** You are completely unprotected against these attacks with biochemical/nuclear deadly warfare agents!

**The failure:** Your existing security systems are completely failing in protecting you from these modern high-tech attacks.

**Act immediately:** Now you need urgently a completely new, additional alarm and security system to fend off this new type of attacks.

A brutal attack on your life - but without any attacker!

A horrible thought - but it's reality. Your enemies have become phantoms - highly technically upgraded and digitized.

**Only a phantom:** No one comes with guns anymore. No one triggers the alarm - no one can be stopped. The attacks are remote-controlled from a great distance.

**A completely new weapon:** A remote controlled drone brings the silent death with biochemical/nuclear toxins.

**The silent killer:** No more shooting - but silent poisoning. These new attacks are totally silent and imperceptible. No warning - no witness.

**Attacks from the Darknet:** Such attacks can now be bought with Bitcoins also from a service-provider in the DARKNET.

Because silent poisoning has replaced gun shooting and no more attacker shows up, the final tragedy comes by the failing of your security systems at these attacks

Why is the danger so great?

Because silent poisoning has replaced gun shooting.

Because these attacks are extremely insidious and imperceptible - invisible, silent and remote-controlled.

Because you have NO warning, NO alarming nor any security system against such high-tech attacks!

No police or authority, no security service or secret agent can protect you. No detection or defence system against such attacks is even available on the market - until now.

All of your existing security systems are completely failing and totally useless for such attacks - opening up a deadly security gap!

- |                          |           |
|--------------------------|-----------|
| - all alarming devices   | = useless |
| - security services      | = useless |
| - police measures        | = useless |
| - personal protection    | = useless |
| - official protection    | = useless |
| - private security-teams | = useless |
| - guard dogs             | = useless |
| - airborne security      | = useless |

What can you do? How to protect yourself?

## The CPA system CERBERUS PROTECTION AUTOSYSTEM

The worldwide new and unique, automatic high-tech protection system against high-tech attacks - it closes the deadly gap immediately!

A high-tech protection shield over your whole life - fully automatic:

**You have nothing to learn, nothing to know and nothing to operate**

for full protection - immediate and permanent 24/7

### CPA system - components & function

#### Component 1:

High-tech bionic attack-scanning sensor module for outdoor mounting at buildings / objects / yachts etc. Detects attacks in real time.

#### Function:

The real-time attack scanner system monitors the entire environment 360° in 24/7/365. It primarily analyses the warfare agent - not the transportation medium.

#### Component 2:

The central electronic unit with integrated artificial intelligence - is evaluating the scanner signal permanently and generating a real-time alarm signal in case of an attack.

## CPA system - real-time alarming in case of an attack

Alerting by mobile phone, up to five users are programmable

Alerting by signal - auxiliary warning devices can be connected

### The CPA system turns every living environment into a fortress against such high-tech attacks

The danger is already lurking - a remote-controlled attack by a combat drone, equipped with biochemical/nuclear warfare agents, is approaching silently.

The drone unloads its deadly stuff. There is no warning system - the drone-attack remains unnoticed. Because the existing security systems cannot detect this - they are useless.

Only an active CPA system can detect such attacks immediately. It triggers an alarm in real-time and thus offers the highest possible protection and counter measures.

video: [www.schaefer-protect.de](http://www.schaefer-protect.de)

## You can forget your active CPA system - but it will never forget YOU!

### Features & advantages of the CPA system:

- permanent active 24/7/365
- no wearing parts
- no maintenance & service required
- no operation required
- use without any previous knowledge
- no learning process required
- built-in self-control
- you don't have to care about anything

### Full protection against sabotage or espionage:

The CPA system cannot be disturbed, located, attacked, hacked or interfered from outside. No one can even find out that it is in active use and operation here.

### The CPA system protects all kinds of objects worldwide, reliable and sustainable:

## The CPA system CERBERUS PROTECTION AUTOSYSTEM

### Technical specifications:

Made in Germany  
burnt-in, operated and tested for at least 1,000 hours

#### Versions:

**MLL version** high sensitivity - 10 years warranty  
**STD version** normal sensitivity - 2 years warranty  
EU version for 230 VAC / 50 Hz / approx. 20 VA  
USA Version for 120 VAC / 60 Hz / approx. 20 VA

Alarm will be sent in real time to max. 5 users via the GSM-net  
Auxiliary additional alarm devices provided  
CPA electronic box dimensions = L 500 x W 400 x H 210 mm  
CPA electronic box weight = 13.5 kg

CPA sensor dimensions = 190 x 100 mm  
CPA sensor weight = 1.0 kg  
CPA sensor cable length = max. 25 meters

Installation:  
easy and quick to install within one day  
all manuals are included

very low power consumption = max. 20 VA  
no Co2 emission  
no radiation emission - passive scanner  
easily recyclable - no problematic materials

The CPA system has been tested and evaluated very well by CERN, Geneva/Switzerland
